The high temperature firing of natural clay products instill unique color/shade variations that may differ from illustrated. Flashed tiles will have a broad color range. Approval samples are suggested.

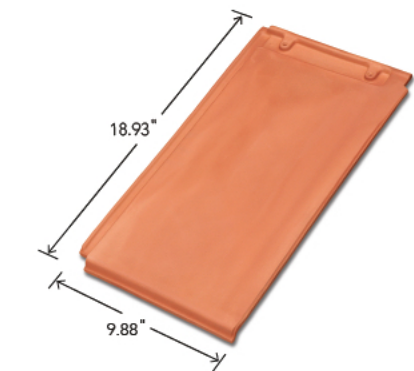

Physical Data

Average thickness	0.47 in
Average total length	12.60 in
Average full width	9.61 in
Average exposed length	11.22 in
Average pieces per linear meter	3.5 pieces
Water absorption once sealed	4%
Average modulus of rupture	175.6 kgf
Average weight per piece	5.11 lb
Average weight per linear meter	17.88 lb

Average thickness	0.39 in
Average total length	11.92 in
Average full width	11.14 in
Average exposed length	11.22 in
Water absorption once sealed	4%
Average modulus of rupture	175.6 kgf
Average weight per piece	5.20 lb

Avg. thickness	0.39 in
Avg. lenght	18.93 in
Avg. width	9.88 in
Avg. lenght exposed	15.43 in
Avg. width exposed	9.05 in
Avg. weight per piece	7.03 lb
Avg. weight per square	787.36 lb
Avg. pieces per square	112 pieces
Water absortion when sealed	5%
Transverse Breaking Strength	660 lbs. Avg.
Net weight per-pallet 300 pieces	2109 lb
Net weight per-pallet 400 pieces	2812 lb

For centuries, architects and builders have chosen the clay tile for its beauty, character, personality and sense of permanence; they have used it as an indispensable element.

Today, the use of clay tiles continues to be valued and appreciated, not only for its aesthetic impact, but also for being a construction material with incomparable thermal and acoustic advantages; in addition to proven resistance and duration. El Aguila employs 21st century technology to manufacture tiles of great beauty, while meeting the most demanding specifications required for a clay tile roof.

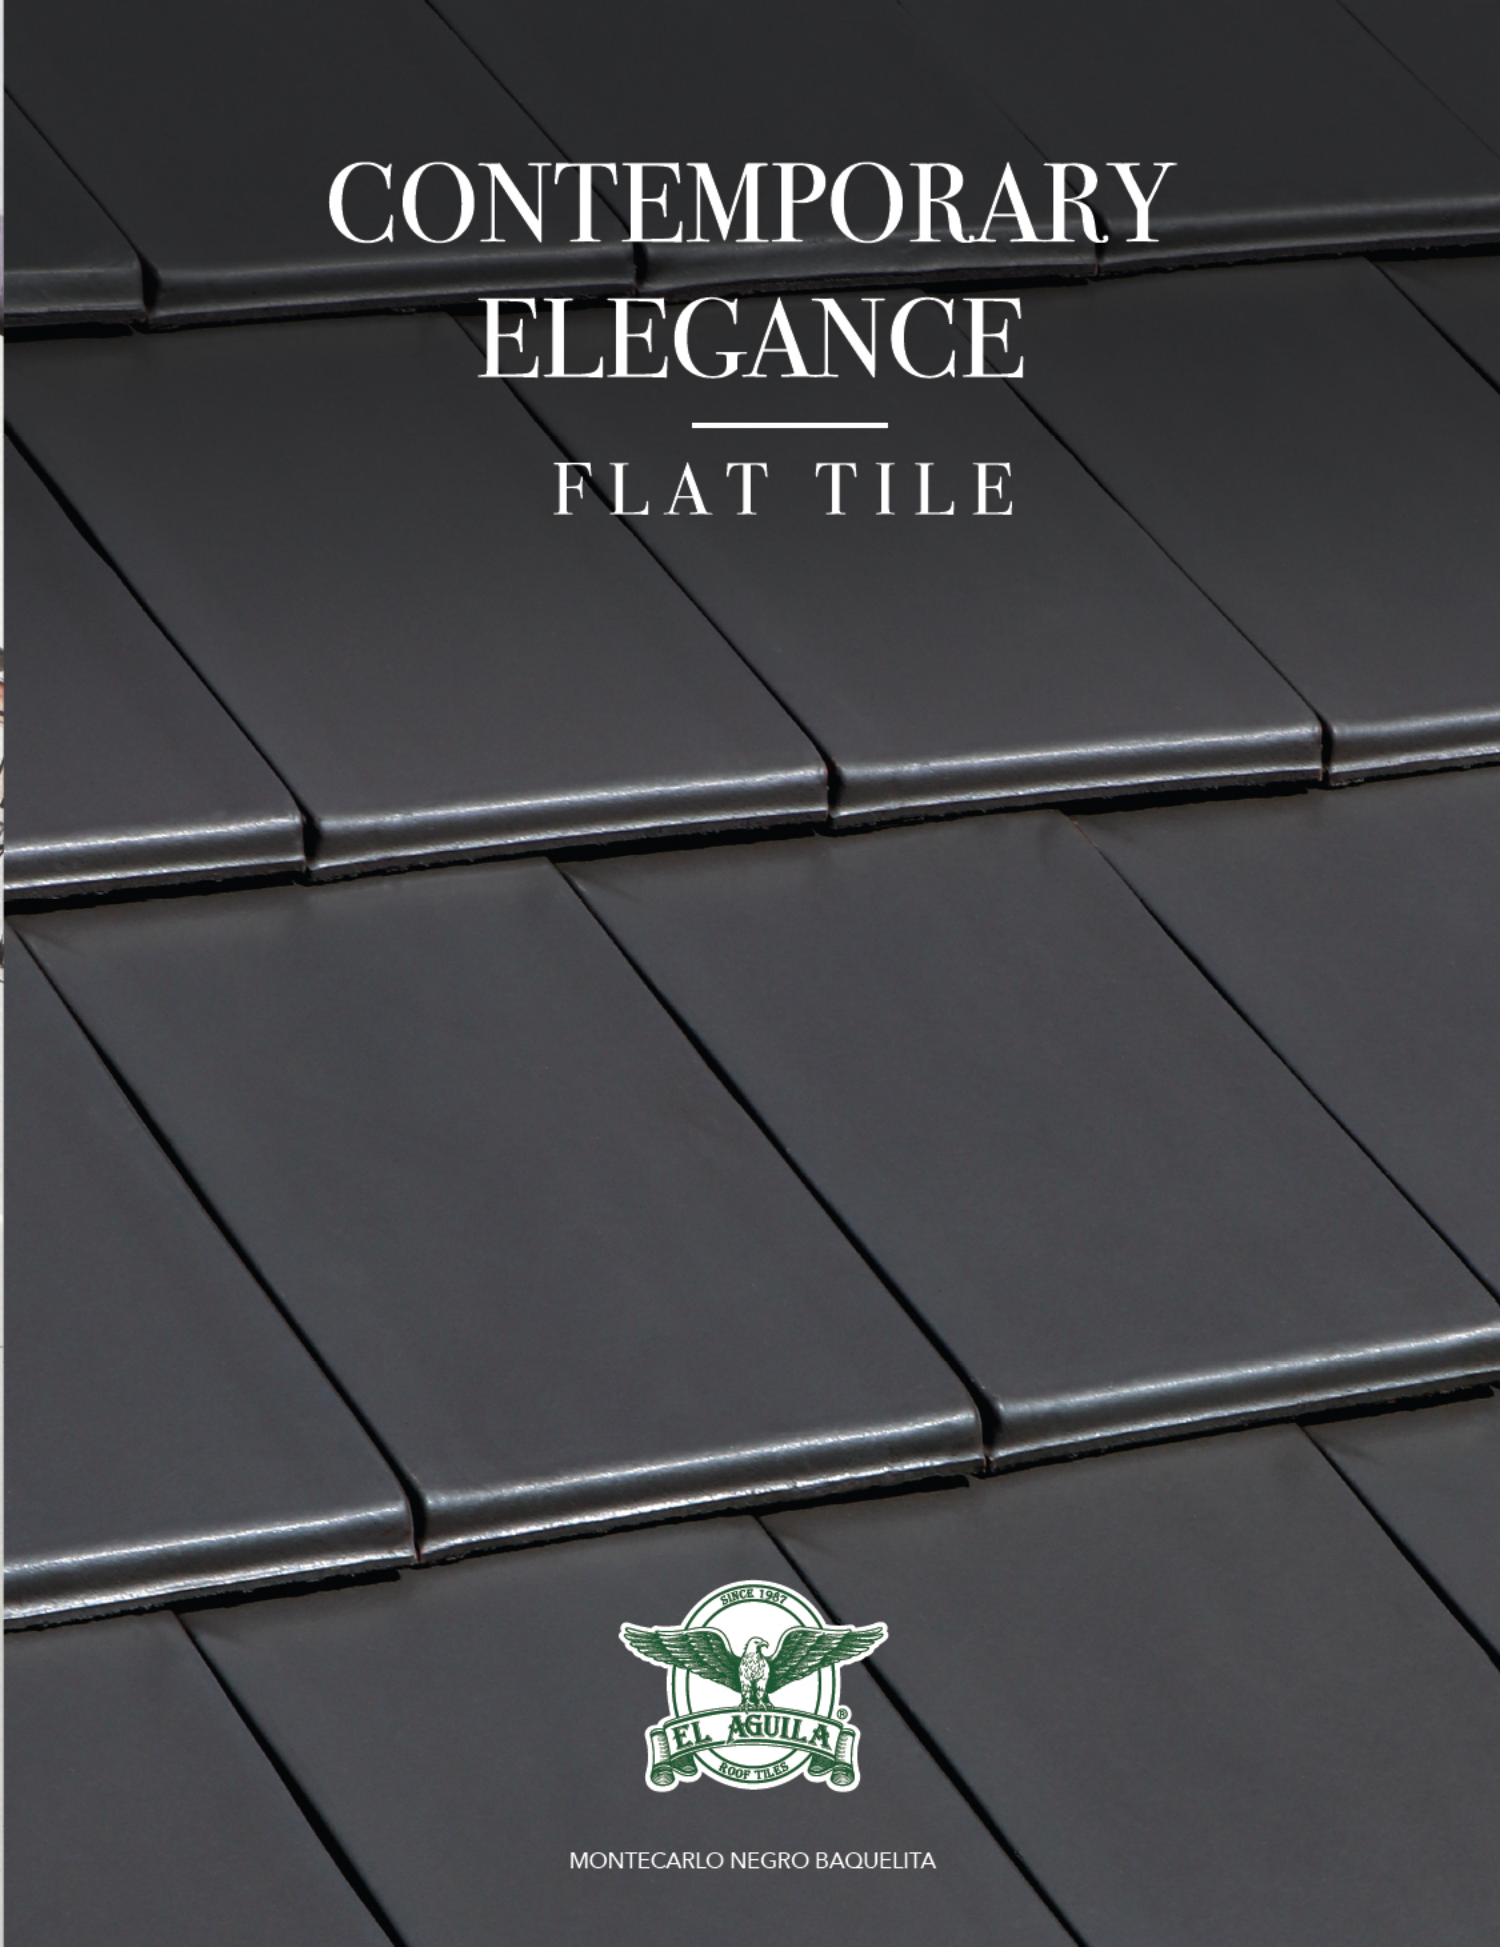

The combination of innovative technology and select clays makes it possible to offer its customers higher quality and more beautiful tiles.
